4. Predefined Aschwanden order schedules
Aschwanden – Bestellliste.rvt
Aschwanden - Liste de commande.rvt

Instructions for use of REVIT families (.rfa)

- Move REVIT family and text file to the desired storage location.
- Open a REVIT project.
- Click Insert tab > Load from Library pane I>  (Load Family).
- Navigate to the storage location of the families.
- Select the family that you want to load
- Select the types needed and click Open.
- The family type is now available to place in the project. It displays in the appropriate category under Families in the Project Browser.

Instructions for inserting schedule views (.rvt) in REVIT

- Click Insert tab > Import panel > Insert from File drop-down >  Insert Views from File.
- Navigate to the storage location of the Aschwanden schedule and select it.
- Check the views you would like to insert and click OK.
- A Aschwanden schedule view is created in the Project Browser with the parameter fields needed for ordering. You may add more if needed.
